## How to Pick Blueberries

When you arrive at our orchard, your containers will be weighed and you'll receive instructions on where to pick. Afterwards, your containers will be weighed again.

- Select plump, full berries with a light gray-blue color. (a hint of red isn't fully ripened)
- It's easiest to hold your container under the bush with one hand and with the other hand cup a ripe bunch and gently rub them with your fingers. The ripe berries will drop into your bucket, while the unripe ones will remain attached.
- Never pile berries high in containers.
- Throw any bad berries into the center of the row.
- Please do not allow children to step on plants.

**Please follow these rules & guidelines for an enjoyable picking experience:**
